## ⚡ CROSS-RACE EXOTIC TICKETS — PITTSBURGH PHIL MULTI-RACE METHOD

Phil's real edge came from connecting races. These tickets compound overlay probabilities across legs. A 40% edge in two consecutive races becomes ~100% edge in the Daily Double.

### DAILY DOUBLE R7 → R9

## NON-STAKES CARD — \$500 ALLOCATION (RACES 1–6, 8, 10)

Apply the same Pittsburgh Phil methodology to the remaining races. Below are the key rules for deploying the \$500 non-stakes budget.

### BET SIZE RULE

\$25–\$75 max per race. Never exceed 15% of the \$500 non-stakes sub-bankroll on any single race.

### M5 OVERLAY MINIMUM

Only bet a race if at least one horse has 10%+ edge. Fading action without an overlay is just donating.

### BOUNCE AWARENESS

Flag any horse whose last-out Beyer equals career best AND ran within 5 weeks. Reduce or eliminate win bets.

### 2ND OFF LAYOFF HUNT

Actively seek horses returning for their 2nd start after a 60-day+ layoff. These are Phil's favorite angles in non-stakes fields.

### TROUBLE HORSES

Any horse with "bumped," "checked," "blocked," or "wide" in last race comment gets +2.5 pts. Look for these in maiden races.

### EXOTIC FOCUS

In non-stakes races, prefer exactas and trifectas over straight win bets. Better risk-adjusted value in smaller fields.

### SHARP COMBO SIGNAL

Trainer/jockey combos with 25%+ win rate and 10+ starts together (M7) get a mandatory inclusion in exotic tickets.

### CLOSING THOUGHT

*"The average man bets on the favorite because he's afraid of being wrong. Pittsburgh Phil bet on the overlay because he wasn't afraid to be right."*

💡 **Suggested Deployment:** — \$30 per race × 3 remaining races (1–6, 8–10) = \$400 base, \$100 reserve for live tote adjustments with — 50%+ flag

## COMPLETE DAY SUMMARY

| RACE                    | EVENT                   | TOP PICKS                                     | WIN BETS | EXOTICS | RACE TOTAL |

## PITTSBURGH PHIL'S MAXIMS — SIGNAL KEY

M1 △ BOUNCE — Career-best Beyer last out within 5 weeks → expect regression

M3 TROUBLE — Bumped/checked/blocked last out → better than finish shows

M2 ★ 2ND OFF LAY — 2nd start after 60-day layoff → peak fitness arrival

M4 CLASS DROP — Running below best class → spot play value

M5 OVERLAY — Model probability >10% above market → bet signal

M7 SHARP COMBO — Trainer/jockey 25%+ win rate, 10+ starts together

M9 IMPROVING — Three consecutive improving Beyer figures → trajectory up

M6 UNDERLAY — Public money well above model → fade signal

M8 SURFACE FIRST — First start on current surface → risk flag

M10 CLOSER 12f — Running style C/S in routes 10f+ → major advantage
